

Amendments to the Specification

Please replace the paragraph at lines 6-10 on page 25 of Applicant's specification with the following amended paragraph:

Expandable cages may also be expanded in two dimensions as illustrated in Figure [[12h]] 12i. Cage element 301 may further comprise an expansion window 320 through its inferior surface and a second internal expandable element 321. As expansion plate 312 is impacted into the device, both internal expandable elements 302, 321 are pushed through their respective expansion windows 305, 320.
